Purdy, of Marlborough, N. Y., who for ten years has been in the constant heat of legal struggle. His, suit has been with one of his neighbors, Robert A. Kerr, who in 1859 leased a farm from Elisha Purdy George's father, for a period of five years, with a covenant to convey the property if Kerr paid \$10,000 and all arrearages of rent at any time during the first

He did not have the money, and they refused to convey unless compelled to. Kerr then commenced suit, and it has run through all possible forms and varieties, being decided and the decision appealed from time and again, the last and recent conclusion being a refusal to compel a conveyance. The property has grown in value until it now involves as much as \$60,000. We again present to the agricultural community our Fertilizers with renewed confidence, as equal, if not superior, to any manure offered for all crops, not excepting Peruvian Guano. Year by year their value has become more manifest, as demonstrated by largely increased sales, and we challenge any brand to show more satisfactory and uniform results. Confining our manufacture to materials of highest standard, as proved by analysis, we claim like results in all time. On the Wheat crop the testimony is of unquestionable character. We respectfully call

attention to our popular Guano, known as GENUINE PHOSPHO-PERUVIAN GUANO,

made of the highest standard of Peruvian Guano and Bone Phosphate of Lime, with Alkaline Salts of Potash, Soda, &c.

BRANDED AA, Centaining 6 to 8 per cent Amminia.

40 to 50 "Bone Phosp'e, Lime. Potash, Soda, &c.

Beautifully prepared and adapted to the Drill, in sacks of 11 to the ton, of 2000 pounds, and sold at \$60 per ton—former-ly \$70 per ton.

The character of this Guano is so well known

as to need but little further commendation from us. Used for many years, it has become a favorite with all consumers, and it only requires a trial to convince all of its value. The Ammonia and Bone Phosphate being in rational proportions, it can hardly fail to render satisfaction, improving the quality and increasing the cropit adds one other most important essential in the permanent improvement of the land--in this particular we question whether it has its equal. It acts wonderfully upon the grass crop, and to such an extent as to bring improverished lands up to a high state of fertility—equalling Bone Dust. Such is the testimony of many accomplished planters. We beg the closest investigation as to the integrity and manufacture of our compounds, and earnestly invite all consumers to inspect our works, material used, and mode of

Capital \$1,000,000.

The use of this Guano since its introduction, on 1864, and the annual increase of its consumption from a few hundred tons the first year of its use, to many thousands of tops, is the best attestation to its value as an efficient agent for the increase of the products of agricultural labor, as

well as to the integrity of its production.

The large capital invested by this Company in this business, and its unusal facilities, enables it to furnish a fertilizer of the highest excellence at the lowest cost to consumers. It is the policy of the Company to furnish the best fertilizer at the lowest price, and look to

large sales and small profit for reasonable returns on capital employed.
